

## 'Top of the World' in Marine Science

Pictured left to right are: Ms Verity Redrup, Kalyn Teeling, Cody Panton and Mr Guy Harvey

Cayman Prep and High School proudly congratulates two of its students, Kalyn Teeling and Cody Panton who received the 'Top of the World' exceptional performance awards from the University of Cambridge International Examinations for gaining the highest marks in the world in Marine Science at AS-Level in June 2010.

Mr Guy Harvey, a renowned artist and marine scientist, presented the certificates to Kalyn and Cody in the new Marine Science lab, one of five world-class science labs in CPHS's new building. He praised the students for their outstanding achievement and congratulated their teacher, Verity Redrup, and the Head of Science, Jason Nehra, on the excellence of the programme. He commended the school on its vision in introducing Marine Science as an A-Level subject for its Sixth Form students and congratulated them on their outstanding science facilities.

Present at the ceremony were the families of Kalyn and Cody, together with teachers and students from the school, and a representative from the Johanna Clarke Foundation. The school wishes to express its appreciation of the grant awarded by the Johanna Clarke Foundation which played a significant part in enabling the school to establish the Marine Science programme in the Cayman Islands, so richly endowed with an abundance of marine life.````
